CAUTION PLEASE READ

GNE HoneyBee Dual Port 800W Optimiser:

The purpose of this document is to illustrate the scenario, where by, you are intending to use the GNE HoneyBee Dual Port 800W Optimiser with only one (1) Solar PV Panel.

In this scenario, the two unused Positive and Negative MC4 connectors **MUST** be connected together to ensure that the Optimiser does not get damaged while operating. Failure to adhere to this guideline may cause the Optimiser to fail and void the warranty.

- As seen in the images, ensure that the unused MC4 connectors are attached together when only using one Solar PV panel
- Ensure that all connections are securely fastened before commissioning the system
- Failure to adhere to these guidelines will void the manufacturers warranty
